

Name: Kenzie

Date: Jan 23, 2018

Hebrew Date: א' תשרי תשע"ח

Do Now

"For those who believe, no proof is necessary. For those who don't believe, no proof is possible."

-Stuart Chase

What do you think this quotation means? Do you agree with it? Explain your answer.

I think that it means that if you believe in
something then you don't need proof but if
you don't believe then there is NO proof. For
example, for people who have faith in a
higher power don't need proof that their god or gods
are real. For people who don't believe in
religion or having faith in a god don't
have anything that will change their mind
because there is NO proof unless you have
faith and don't need proof.

Name: Valentina

Date: 1/23/19

Hebrew Date: _____

"For those who believe, no proof is necessary. For those who don't believe, no proof is possible."

-Stuart Chase

What do you think this quotation means? Do you agree with it? Explain your answer.

I think that this quote means that for some or who believe in extraordinary things would be more likely to believe if something extraordinary happened. And for someone that thinks not so extraordinary would need proof of something happening. One example could be someone that believes in God compared to someone that doesn't believe in God. If something crazy happened like God talked to someone, the person who believes in God would be more likely to believe it, and need less proof than someone that doesn't believe in God. I don't think that this is true.

"For those who believe, no proof is necessary. For those who don't believe, no proof is possible."

-Stuart Chase

What do you think this quotation means? Do you agree with it? Explain your answer.

I think that this quote means that if you believe in something, you don't need anything to prove it. If you don't believe in something, then proof can't be provided. I think this quote is absurd because anything that happens has a logical explanation and therefore can be proven.
